SUBJECT INDEX

In most cases the page numbers refer to the *first* page of the entire article which contains the subject listed.

A

Abrasive
- Cleaning applications 330
- Resistance of irradiated wood patterns 326
- Wear studies for patterns 401

Acurad process
- Thermal analysis of dies 217

Aircraft structures and
- Magnesium alloy QE22A 376

Air pollution
- Control 321
- Equipment 321
- Legislation 321

Aluminum
- Centrifugal casting and solidification 42
- Counter-gravity casting in green sand molds 581
- Grain orientation by "delayed chill" 433
- Pattern wear studies 401
- Permanent molding 21
- Torque test for evaluating 548

Aluminum Bronze
- Dealuminization of 676

Aluminum-Silicon
- Solidification analogous to cast iron 520
- Spheroidal silicon nucleation ... 520

Analog
- Thermal analysis of die casting dies 217

Annealing
- White iron heavy section 777

Apprentice training
- Management responsibility 368

Automation of
- Full mold process 147
- Patternmaking by numerical control 593
- Sand testing 637
- Sand testing and binder additions 353

B

Bentonite and
- Bonded graphite molds 201
- Bonded durability 408
- Cereal bonds 16
- Dilation of molds 493
- Water systems 13

Binders for
- Automatic additions 353
- Clay-water systems 10
- Graphite molds 38

Bonding of sand
- Clays 408
- Compression strength 408
- Durability tests 408
- pH relation 408

Boron nitride
- Graphite nucleation with 428

Brass
- Pattern wear studies 401

C

Carbon equivalence and
- Contraction 394
- Feed metal requirements 394
- Solidification 394
- White iron 777

Carbon Equivalent test for
- Cast Iron, hypereutectic 176
- Ductile Iron 4

Casting
- Dimension and effect of clay on mold dilation 493
- Directly from ore 484

Casting Defects (see Defects)

Casting Metals
- Aluminum alloys by centrifugal casting 42
- Aluminum alloys by permanent molding 21
- Aluminum alloys with double oriented grains 433
- Aluminum bronze and dealuminization 676
- Cast Iron, Hypereutectic 176
- Ductile Iron and cerium effect .. 372
- Ductile Iron, heavy section 4
- Gray iron, directional solidification study 511
- Iron and steels by permanent mold die casting 181
- Magnesium casting of aircraft structures 376
- Magnesium-Lithium alloys 205
- Magnesium sand castings, thin wall weld repair 530
- Magnesium-Zirconium alloys 229
- Magnesium-Zirconium alloys ... 376
- Magnesium-Zirconium alloy QE22A 17
- Malleable Iron, and Impact transition temperature 665
- Ni-Hard cast iron 273
- Steel, iron and nickel base alloys undercooled 191
- Titanium 38
- White iron 777

Casting Processes (not including regular sand casting)
- Centrifugal casting of Aluminum alloys 42
- Full Mold process 147
- Permanent mold die-casting of Iron and steels 181
- Permanent molding, Aluminum alloys 21
- Precision casting of gas turbine parts 360

Cast Iron (see also Gray, Ductile, Malleable and White iron)
- Carbon equivalent test for hypereutectic 176
- Directional solidification with zone refining 511
- Graphite nucleation 428
- Graphite nucleation with superheating 161

Melting
- Cupola, Arc, Induction compared 113
- Ni-hard vacuum melting 273
- Ore directly to casting 484
- Pattern wear studies 401
- Solidification analogous to Al-Si alloys 520
- Solidification and surface defect study 394
- Trace elements effects and their neutralization in 815
- Vacuum melting 558

Centrifugal casting
- Aluminum alloys
  - Microstructure 42
  - Properties 42
  - Segregation 42
  - Solidification 42
  - Turbulence 42
- Gray Iron and microprobe study of sulfur segregation 649

Centrifugal force and
- Aluminum solidification 42

Cerium in
- Ductile Iron and effect on carbides in thin sections 372
- Gray Iron Fe-C-Si alloys and directional solidification 511
- White iron 777

Check formation and
- Contraction during solidification . 394

Chills for
- Aluminum, for grain orientation . 433
- Ductile iron for Civil engineering applications . 284
- Ductile iron, heavy section 9

Clay and
- Bonding durability study 408
- Clay-water mixtures and thermal expansion 493
- Clay-water systems
  - Adhesion 10
  - Cereal and bentonite bonds .. 10
  - Gel Points and gel strength .. 10
  - Molding sand properties 10
  - Mulling effect 10
  - Resilience 10
  - Soil mechanics 10
  - Southern bentonite-water system 10
  - Western bentonite-water system 10
- Effective clay and high pressure molding 209
- "Efficiency of Clay Usage" test . 173
- Green strength loss in recycling sand 408
- Latent clay and high pressure molding 209
- Mold dilation 493

Cleaning equipment
- Abrasives at high speed 330
- Cost savings 471
- High speed grinding 186
- Preventive maintenance 457

Test procedures 199
Magnesium treatment
Ductile iron, heavy section 9
Magnesium Zirconium castings
Aircraft structure development .. 376
Bottom running technique 17
Brittle fracture risk 376
Creep resistance 229
Defects 376
Directional solidification 17
Eutectic depletion 229
Eutectic enrichment 229
Exothermic sleeves for 229
Fatigue limit study 376
Gravity shrinkage 229
Hot tearing 229
Inclusions 229
Mechanical properties 229
Mechanical properties and temperature effect 376
Microporosity 17
Microshrinkage 229
Oxide films in 229
Pressure testing 17
Radiographic examination 17
Radiographic Standards 229
Segregation in 229
Slit gating techniques for 17
Tensile properties 17
Malleable Iron
Annealing practice survey 605
Graphite nucleation with Boron nitride 428
Heat treatment and annealing .. 605
Impact resistance related to phosphorus and other variables 665
Melting equipment survey 605
Melting practice survey 605
Metal composition survey 605
Microstructure standards 73
Pressure die-casting with molybdenum molds 184
Riser dimension calculations 659
Temper carbon nucleation 432
Trace elements effects and their neutralization in 815
Management
Apprentice training responsibility 368
Maraging Steel with 17% Nickel
Casting 294
Heat treatment. 294
Light and Heavy sections 625
Mechanical properties effect 625
Microstructure effect 625
Properties 294
Tensile properties effect 625
Weldability 294
Mechanical properties of:
Aluminum alloy melts 548
Aluminum centrifugal castings .. 44
Aluminum, counter-gravity casted 581
Cast iron with 5% Si, vacuum melted 558
Die-casting dies 133
Iron and nickel base steel highly undercooled 191
Magnesium-Lithium castings ... 207
Magnesium-Zirconium castings .. 229
Magnesium-Zirconium QE22A .. 17
Maraging steel with 17% nickel . 294
Maraging steel with 17% nickel from heat treatment 625
Ni-Hard cast iron vacuum melted and poured 273
Patterns from irradiated wood .. 326
Patterns from laminated plastics . 292
Precision castings related to directional solidification 360
Sand systems, repeatedly circulating 338
Steel castings and discontinuities effect 759
Mechanization (see Automation)
Melting
Cast Iron raw material selection . 316
Cast Iron survey 113
Magnesium-Lithium alloys 205
Malleable iron survey 605
Ni-hard cast iron 273
White iron heavy section 777
Metal mold reactions in
Steel castings 741
Microporosity
Magnesium Zirconium alloy QE22A 17
Steel, Iron and Nickel base, undercooled 197
Microstructure
Steel, iron and nickel base undercooled 191
Microstructure and
Aluminum alloy centrifugal castings 45
Cast iron directional solidification 511
Cast Iron with 5% silicon vacuum melted 558
Copper base alloys 388
Ductile iron in solidification and cooling curve study 541
Graphite nucleation by Boron nitride 428
Gray Iron direction solidification study 511
Malleable Iron standards 73
Ni-hard cast iron 273
Sand grain surfaces 104
Microstructure Standards for
Malleable Iron
Definition and measurement of Rims 73
Definition and ratings of graphite nodules 73
Description and ratings of matrix structures 73
Metallographic control 73
Metallographic preparation ... 73
Mold
Cavity enlargement and
Casting Shape 708
Influence of metal factors 708
Sand composition 708
Coating and
Steel casting finish 741
Dilation and clay effect 493
Wall movement and hardness ... 209
Washes for graphite molds 183
Molding
High pressure 209
Molding sand
Clay-water systems in 10
Dark molding sand and scabbing 33
Green molding sand mechanics . 126
Green sand impact testing and stripping 47
Green strength vs sheer resistance 222
Mold cavity enlargement effect . 708
Molybdenum
Permanent molybdenum molds for pressure die-casting of Iron and steels 181
Mottling control and
White iron heavy section 777

N

Neutralization of
Trace elements in Gray, Ductile and Malleable iron 815
Ni-Hard cast iron
Vacuum melting and pouring ... 273
Nodularizing of Ductile Iron
Cerium effect 372
Evaluation of nodularizers 611
Treating practice 282
Nonferrous metal refining with DM Converter 568
Nuclear Radiation
Irradiated wood for patterns ... 326
Nuclear Reactor vessels
Evaluation casting components . 688

Nucleation (see Graphite nucleation)
Morphology of graphite or silicon as a function of temperature range of nucleation and growth 520
Temper carbon in Malleable iron 432
Numerical control for
Patternmaking 593

O

Oolitization and
Foundry Sand systems 338
Oxide films in
Magnesium Zirconium castings . 229
Ore
Directly to castings 484
D-LM reduction process 484

P

Patterns
Abrasive wear studies 401
Irradiated wood 326
Plastic fiberglass 292
Wood laminates, compressed ... 501
Permanent Molds
Cast Iron molds
Heat extraction study of 21
Copper molds
Heat extraction study 21
Graphite molds for:
Magnesium-Lithium castings . 199
Titanium castings 38
Molybdenum molds for:
Pressure die-casting of iron and steels 181
pH and
Compression strength 421
Sand Bonding 421
Plant Layout
Planning a lighting system 257
Plastic fireclay
Bonding durability study 408
Plastics in
Core box, ... 292
Irradiated wood patterns 326
Patterns 292
Pattern wear studies 401
Porosity of
Copper base alloys 383
Die-Castings and vent and gate areas effect on 727
Pouring
Aluminum by counter-gravity ... 581
Cast Iron and surface defects ... 394
Ductile iron, heavy section 4
Magnesium-Lithium castings ... 199
Ni-Hard cast iron in vacuum ... 273
Pressure die-casting of
Iron and steel 181
Pressure testing
Magnesium Zirconium alloy QE22A 17
Preventive maintenance of
Cleaning equipment 471
Cleaning room 457
Production control by
Data processing in foundry 65
Flow charts and printed forms .. 305
Sand strength testing accuracy .. 439
Properties (see Mechanical properties)
Property changes and conditioning of repeatedly circulating sand systems 338

R

Radiation
Irradiated wood for patterns ... 326
Radiographic examination of
Magnesium Zirconium castings . 229
Magnesium Zirconium QE22A .. 20
Refining of alloys with
DM converter 568
Repair welding of thin wall magnesium sand castings 530
Risers for:
Magnesium-lithium castings counter-gravity poured 568
Malleable castings, dimension calculations 659
Running techniques for
Bottom running of Magnesium Zirconium alloys 18

S

Sand
Clay-water systems 10
Composition and Mold cavity enlargement 708
Control simplified 119
Grain surface study 104
Green molding sand mechanics . 126
Scabbing defects 33
Without binder for full mold castings 147
Sand Binders
Bentonite clay bonding durability 408
Plastic fireclay bonding durability 408
Sand Bonding (see Bonding of sand)
Sand compression strength and Bonding 421
pH 421
Testing Improvement 439
Sand expansion defects
Heat of radiation as cause 33
Sand Molds
Dilation and clay effect 493

History and development 637
Sand strength, improvement in accuracy and precision 439
Scabbing
Defects from heat by radiation absorbed by dark molding sand 33
Scrap
Sheared auto slab production ... 302
Sources and production methods 316
Seals for
Core boxes 480
Segregation in
Aluminum centrifugal castings .. 45
Gray iron of sulfur 649
Iron and nickel steels undercooled 194
Magnesium Zirconium castings .. 229
Sheer
Resistance and green strength .. 222
Test of sand, improvement 439
Test results read as tensile values 222
Shock wave technique of
Hydro-Dynamic Welding 564
Shrinkage and
Copper base alloys 383
Slag and
Cupola control 735
Slag-Metal reactions 735
Slit Gating of
Magnesium-zirconium QE22A .. 18
Snagging grinders
High speed 186
Selection and maintenance 299
Soil mechanics
Clay-water systems 10
Solidification and (see also Directional Solidification) Aluminum casting in metal molds 21
Aluminum centrifugal castings .. 42
Cast iron and aluminum silicon alloys compared 520
Cast iron contraction 394
Cast iron surface defects 394
Chvorinov's rule 28
Copper base alloy defects 383
Ductile iron cooling curves 541
Ductile iron, heavy section 9
Highly undercooled castings 191
Magnesium-Zirconium castings . 18
Steels, iron and nickel base, undercooled 191
Spheroidal graphite nucleation
Cast iron 520
DM converter 568
Spheroidal silicon nucleation
Aluminum-silicon alloys 520
Squeeze molding
Test for sand mixtures 222
Standards
Magnesium Zirconium castings .. 229
Microstructure of Malleable Iron 73
Steel Castings (see also Maraging steel)
Die-casting with permanent molybdenum molds 184
Fatigue properties and effect of discontinuities .. 759
Heavy section 688
Heat treatment of 688
Low alloy 688
Metal mold reactions in 741
Nuclear reactor components 688
Permanent molybdenum molds for 184
Vacuum degassing of 688
Stripping properties from impact testing of Green sand 47

Sand testing 637

T

Tensile
Properties of
Magnesium Zirconium alloy QE22A 17

Maraging steel with 17% Nickel from heat treatment 625
Test
for Aluminum melts 548
for sheer test for squeeze molded sand mixtures 222
Improvement for sand 439
Testing
Bonding Clay durability 408
Carbon Equivalent for Cast Iron hypereutectic 176
Carbon equivalent of Hypereutectic cast iron 176
Ductile Iron, heavy section 4
Effective clay 173
Effective clay 211
Fatigue limit of QE22A 376
Impact for green sand stripping . 47
Latent clay 173
Magnesium-Lithium alloys 206
Magnesium Zirconium alloys by Radiograph 229
Ni-Hard cast iron 273
Sand automatically 353
Sand strength, accuracy improvement 439
Specific gravity vs thermal gradient of copper base alloys . 385
Tensile and Sheer for squeeze molded sand 222
Tensile vs thermal gradient of copper base alloys 385
True clay 173
Thermal analysis of:
Clay bonding durability 408
Die casting dies 217
Ductile iron 541
Thermal expansion and
Clay-water mixtures 493
Thermal fatigue of
Die-casting dies 133
Thermal gradient and
Copper base alloy solidification . 383
Titanium casting
Graphite molds for, with non-reactive flux binder 38
New developments 38
"Toledeltos" electrically sensitive paper for thermal analysis of die-casting dies 217
Torque test for
Aluminum alloys 548
Trace elements effect and neutralization in
Gray iron 815
Ductile iron 815
Malleable iron 815
Tubular steel welding via shock wave technique 504
Turbulence
Aluminum alloy centrifugal castings 42

U

Undercooling
Iron and nickel base steel alloys 191

V

Vacuum
Degassing of:
Steel, low alloy, for nuclear reactor vessel components .. 688
Melting
Cast Iron with 5% Silicon 558
Ni-Hard cast iron 273
Pouring
Ni-Hard cast iron 273
Venting
Die-Castings and gate area effect on porosity 727

W

Welding
Ductile iron using Gas-Metal-Arc short circuiting transfer 721
Magnesium thin wall castings ... 530
Maraging steel with 17% nickel . 294
Tubular steel using Hydro-Dynamic method 564
White iron
Annealing 777
Carbon equivalent 777
Casting 777
Graphite formation 777
Melting 777
Mottling controls 777
Ladle additions 777
Wood laminates, compressed for Patterns 501

Z

Zone Refining for
Cast iron directional solidification study 511
